ABOUT ME

Full-Stack Developer, blending the precision of engineering with the creativity of web development. After earning my French aerospace engineering degree, I transitioned into tech to build impactful applications.

WORK EXPERIENCE

Full-Stack Developer
Capgemini, Rennes France   **2024 - Today**

- **Web Application Development**: Contributed to the development of multiple web applications focused on boat and sailor management using Angular and Spring.

Full-Stack Developer
Sopra Steria, Rennes France   **2021 - 2024**

- **Web Application Development**: Participated in the creation of a web application for managing military vehicle maintenance using Angular and Spring.

- **Data Integration with Talend**: Used Talend Open Studio to collect data from various file types (xlsx, xml, json) and REST APIs, inserting it into databases.

- **Mentorship**: Supervised and guided a trainee, providing support and fostering professional growth.

PERSONAL PROJECTS & SKILLS

- **Web Application Development**: Each logo showcases a website I built in my free time, covering topics like recipe management, investments tracking, and even a dating platform. Check out my portfolio to explore them !

Angular & Spring Boot

Talend Open Studio
